Professional Summary

- Methodical and highly skilled Software Engineer with extensive experience in developing, deploying, and securing scalable software solutions.
- Proven ability to collaborate with cross-functional teams and stakeholders to deliver reliable, forward-thinking designs that align with business goals.
- Adept at rapid problem-solving, optimizing system performance, and implementing stringent security measures. Dedicated to driving business success through high-quality code, automation, and continuous improvement.

Technical Skills

- **Languages:** Python, Java, PHP, C#, C++, JavaScript, HTML, CSS, SQL, Bash/Shell
- **Frameworks & Libraries:** React, WordPress, Playwright, Selenium, Generative AI (LLMs, GANs)
- **DevOps & Tools:** Git, Bitbucket, Kinsta, Teamwork, Linux/Unix (SSH Terminal), Multithreading, RESTful APIs
- **Security & Testing:** Visual Regression Testing (VRT), Web Application Security Hardening, Penetration Testing, API Security

Experience

9H Digital | Malta

(Remote) Senior Software Engineer (Project Contract)

June 2026 – August 2026

- Enterprise Client Delivery: Delivered rapid full-stack development and QA solutions for 50+ clients, including major enterprise accounts such as Hilton Malta, Marriott Malta, and Audi Malta, utilizing PHP and Python.
- Test Automation & VRT: Engineered a custom Visual Regression Testing (VRT) pipeline using Python, Playwright, and Selenium, implementing multithreading to significantly reduce test execution time across multiple client environments.
- DevOps & Workflow Management: Managed deployment workflows via Bitbucket and Kinsta, tracked project milestones using Teamwork, and utilized secure SSH/Linux terminal administration for efficient server-side troubleshooting.
- Security & API Hardening: Diagnosed and resolved complex website and API issues, while implementing rigorous web application security hardening measures to ensure data protection and compliance for high-profile clients.

Clear Nexus USA

(Remote) Senior Software Engineer

October 2023 – Current ■

- Led the development of a robust financial system.
- Designed and implemented APIs for managing financial transactions, adhering to RESTful principles.
- Collaborated closely with stakeholders to align system functionalities with business goals.
- Implemented stringent security measures for compliance with industry standards.
- Optimized system performance to handle increased user demands and transaction volumes.
- Conducted thorough testing and debugging to ensure system reliability and stability.
- Provided technical guidance and support to facilitate system integration and utilization.
- Contributed to comprehensive technical documentation for ongoing maintenance and enhancement.

Global Results

Cairo, Egypt Software Engineer

Jan 2022 –October 2023 ■

- Developing an AI website generator solution:
- Created an AI-powered solution that automates website creation using generative AI models.
- Training other engineers:
- Conducted training sessions for new engineers, helping them understand the project's technologies and goals.
- Managing the cloud part of the project:
 - Oversaw the deployment and management of the project on cloud platforms for scalability and reliability.
- Adding security measures:
- Implemented robust security protocols to ensure data privacy and protection for users.
- Integration of generative AI models: - Enhanced the website generator by integrating generative AI models, including text-to-image GAN and Language models.

Branspect

Cairo, Egypt Software Engineer

Jan 2021 – Jan 2022 ■

- Designed, developed and deployed software to meet business needs.
- Debugged applications to resolve logical and programming issues.
- Converted customer and product requirements into logical and well-performing software applications.
- Organized development projects to fit within the established schedule and budget limitations.
- Participated in budget planning for application and software maintenance and development.
- Trained end-users on the functions and optimal use of new software applications.
- Determined whether user needs could be incorporated into existing applications or required new development.

Professional Training & Projects

PwC (PricewaterhouseCoopers) – Software Engineering Bootcamp

Jan 2025 – Mar 2025 | Cairo, Egypt

- Completed an intensive 2-month bootcamp covering enterprise software engineering, agile methodologies, and advanced security practices.

- Delivered a live project for an insurance company, designing and deploying a scalable system to meet client needs.
- Applied expertise in architecture, security, and data handling to ensure high system reliability.
- Presented final project to PwC mentors and industry leaders, showcasing problem-solving, teamwork, and client-focused delivery.

Education

Ain Shams University

Bachelor's degree: Cyber Security
